DETAILED ACTION

Allowable Subject Matter

1. Claims 1-12 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The applicant teaches a method of speech recognition by performing adjustment of internal parameters for convolution distortion and additive distortion at the same time without additional data collection. In the invention the application includes modifying mean vectors of a HMM models with current estimates compensating for static MFCC, first order dynamic MFCC and second order dynamic MFCC. The prior art of record fails to teach or fairly suggest the claimed combinations of features. The prior art of record particularly fails to teach in combination with other limitations, to provide a channel estimate as function of the acoustic and channel environment as well as the amount of channel data observed by adding SNR-dependent inertia to the channel estimate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
